Man Kiu College
Announcement on “Cessation of Secondary One students Admission from year
2023-2024”

Since the establishment of Man Kiu College in 1977, the Incorporated Management Committee, all the teaching staff and parents have been dedicated to provide high-quality educational services for the students of the School. In recent years, there has been a structural decline in the population of school children, leading to changes in the educational ecology. After examining the future development of the School, the Incorporated Management Committee plans to change the school's operation mode. The school will stop enrolling Secondary One students from school year 2023-2024, and will not participate in the Secondary School Places Allocation System (SSPA) from the cycle of SSPA 2022-2024 onwards.

Students that are currently studying in Man Kiu College will continue their education under the original mechanism. Students that are enrolled in Secondary 1 and 2 in school year 2022-2023 will participate in the Central Placement Arrangement after completing Secondary 3, and will be transferred to other subsidized schools to continue with their senior secondary curriculum. As for other levels, students can complete their senior secondary curriculum at Man Kiu College with government funding until graduation. The School will cease to operate on a subsidized basis no later than 1 September 2026. The Education Bureau and the School shall endeavor to assist every student to continue their studies according to their preferences.

The Incorporated Management Committee of Man Kiu College sincerely thank you all for your trust and support. We will continue to cooperate with the development policy of the Education Bureau to provide high-quality educational services to society. The School will notify all stakeholders and explain the relevant arrangements in due course.

Chan Boon Teong

Supervisor, Man Kiu College

Chairman, Incorporated Management Committee of Man Kiu College
