Learning Support for Non-Chinese Speaking (NCS) Students

The school provides non-Chinese speaking (NCS) students with additional support to learn the Chinese Language.

Supporting each NCS student's needs, we offer them language support through remedial classes and inclusive cultural activities after school to consolidate what they have learnt in the Chinese Language lessons.

We have also appointed an additional teaching staff to provide them with pastoral care and support in learning the Chinese Language. In this way, we can develop a solid and adaptable school-based Chinese Language curriculum to cater for their needs of learning Chinese as a second language.

To effectively monitor their learning progress, and to offer them timely and appropriate follow-up support, we provide tailor-made learning materials and exam papers matched to their needs, and we also employ our school-based Chinese Language assessment tools to evaluate their performance and provide feedback.
